## WORK TO BE PERFORMED

- Remove and recycle the existing equipment, haul away all debris
- Provide the necessary sheet metal to connect the new equipment to the existing supply and return duct system.
- Rewire the high and low voltage wiring as needed to meet current codes
- Patch and seal all holes and concrete, silicone or duct seal as required.
- Run the drain with schedule 40 PVC plastic piping.
- Replace the existing lineset.
- Replace outdoor disconnect with a new fused disconnect to meet current codes.
- Install on existing concrete slab if possible, replace with new composite slab if existing is not usable.
- Reuse poles if mounted to wall
- Install rubber grommets under the condenser to limit vibration and noise.
- .
- Rewire the high and low voltage wiring as needed to meet current codes
- Provide all needed parts and labor to completely install your new system.

## Installed Base Price: \$3,140.00

The installed base price of \$3,140.00 includes the listed equipment, parts and labor. Optional pricing, upgrades, \$165 for electrical & mechanical permits may be added to the system price for a total price to be financed. For 36 month financing on \$3,140.00, less \$314.00 (10% down payment), leaves a balance of \$2,826.00. This amount financed over 36 months at 9.99% interest is \$91.17 per month. If you choose 48 monthly payments on the same \$2,826.00, the monthly payment at 9.99% interest would be \$71.67 per month. By applying for credit, you are requesting a Synchrony Financial Credit Card which can be used for future purchases to the extent of your credit limit only good at Recker & Boerger. The above terms only apply if monthly payments are made as agreed. If the account becomes sixty days past due, standard account terms will apply. As of November 11, 2014, standard terms were 29.99% APR. All terms are subject to approval by Synchrony Financial.

Listed equipment guarantees are expressed in the manufacturers literature. The homeowner is responsible for filter cleaning, resetting circuit breakers, replacing air filters, and replacing blown fuses. Homeowner also acknowledges that Recker & Boerger is in no way liable for any damage that may occur due to equipment malfunction. Interest rates are subject to change without notice. All warranty service is to be performed during normal working hours. General maintenance in the form of a yearly clean and check is required to keep the labor portion of your extended warranty in effect. The parts portion of your warranty is backed by the manufacturer, but the labor to replace any part that fails after the first year will be billable at standard service rates unless a clean and check has been performed within the previous 12 months. Only 1 clean and check need be performed per year regardless of the equipment installed. Recker and Boerger recommends a yearly cleaning to reduce the chance of system break down and to maintain a high level of system efficiency. Failure to maintain your system yearly will void any and all labor warranties. All accessories are 1 year parts and labor, unless otherwise listed. All equipment is subject to availability.
